INTRODUCING

UFRC
UNDER FLOOR RACK COOLER®

A better approach to data center cooling

- **Replaces traditional large air handlers**
  - Small units under each server rack
  - Virtually linked together for pod level control
  - Physically connected to eliminate underfloor plenum

- **Responds to varying heat loads dynamically at the pod level**
  - Eliminates hot spots
  - Delivers cooling air as needed
  - More energy efficient

- **Easily scales to meet unpredictable future requirements**

- **Patents Pending**

Global IFS®
INTEGRATED FLOORING SOLUTIONS

The gold standard for future ready data center cooling
